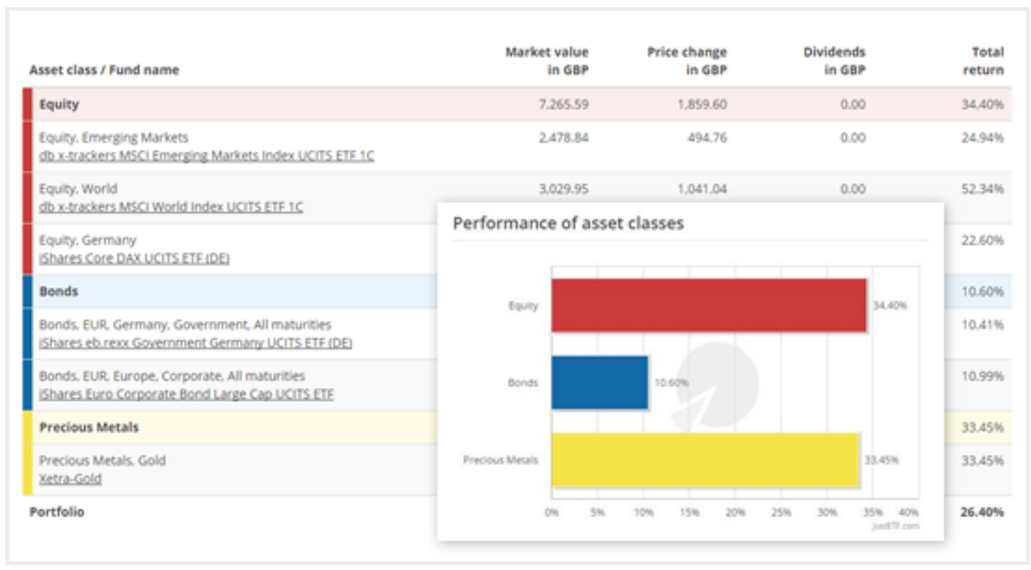
**Your advantages**

- Historic return simulation of ETF portfolios
- Performance and risk analysis
- Portfolio-monitoring with e-mail alerts
- Easy portfolio rebalancing
- 5 portfolios included

### Detailed analysis of returns and performance attribution

Analyse - like a professional - your performance on portfolio, asset class and ETF level along freely defined time periods. The analysis is presented with meaningful line and bar charts.

Take advantage of time-weighted return calculations including and excluding fees, taxes and dividends.



### Portfolio and benchmark comparisons

Compare effortless the return of your different portfolios and simulate different ETF strategies. All your portfolios are available as benchmark. You can also use equity indices such as the MSCI World for comparisons.

Even comparisons with interest rates are possible.
